

AuditBOT JAVA Dashboard Deployment Steps

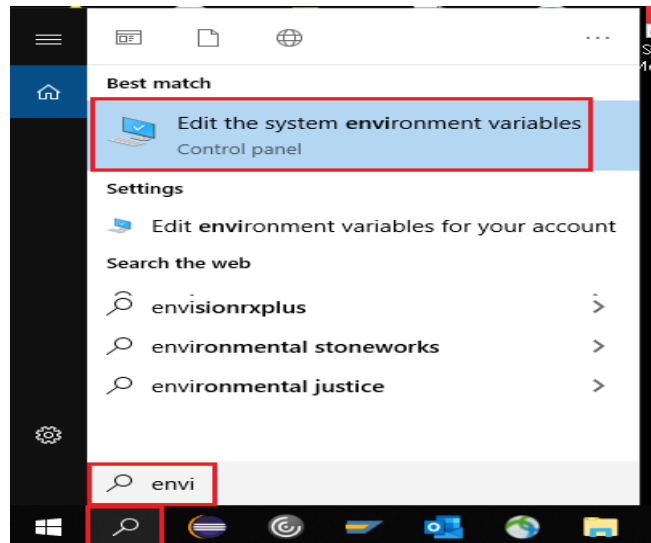

For

Windows Server

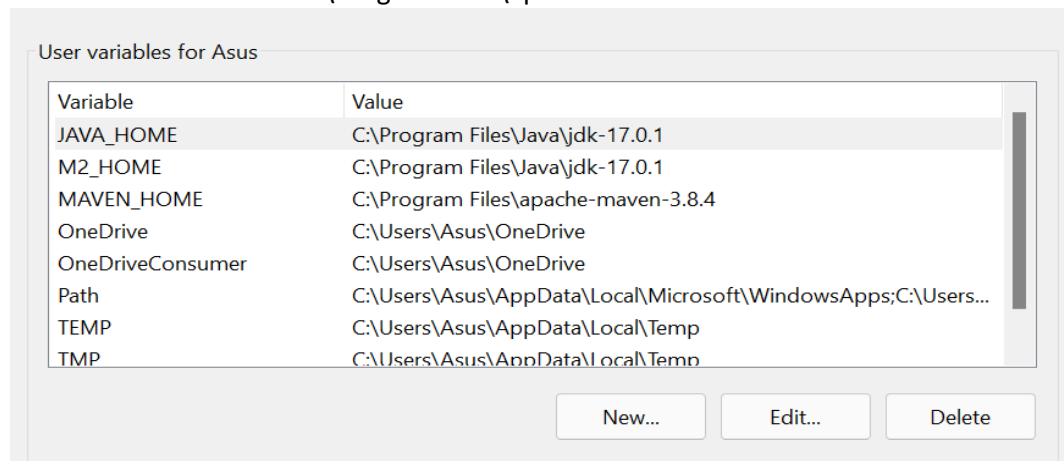

AUDITBOT DEPLOYMENT PROCESS for WINDOWS Server

Windows Environment Setup

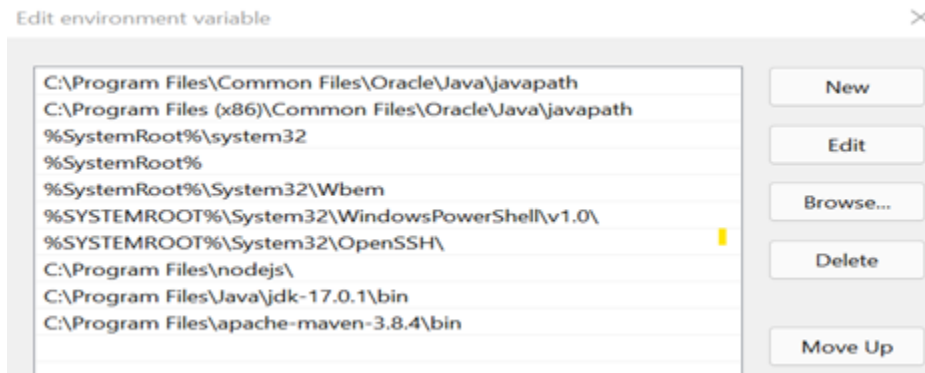

1. Download and install the packages below to set up the environment
 - a. NodeJS - <https://nodejs.org/en/download/>
 - b. Java - <https://www.oracle.com/java/technologies/downloads/#jdk17-windows>
 - c. Maven - <https://maven.apache.org/download.cgi>
 - i. (Download and extract 'Binary zip archive')
 - ii. Move the extracted file 'apache-maven-3.8.4' to "C:\Program Files\ "
 - iii. Go to 'Start' and search for 'Environment Variables' and select 'Edit the system environment variables'

- iv. Click on 'New' under User Variables and then add the below Variable Name and Variable Values
 1. Variable Name: JAVA_HOME
Variable Vaue: C:\Program Files\Java\jdk-17.0.1
 2. Variable Name: M2_HOME
Variable Vaue: C:\Program Files\Java\jdk-17.0.1
 3. Variable Name: MAVEN_HOME
Variable Vaue: C:\Program Files\apache-maven-3.8.4

- I. Then go to 'System Variables' in the same Environment Variables Window and double click 'Path' and add the path of the bin files of Java and Maven as the image below.

2. Verify the successful installation through the below command prompt codes
 - a. node -v
 - b. java -version
 - c. mvn -v

AuditBOT Application javaApp Setup

3. Download and Extract the 'javaApp_win.zip' shared by AuditBOT
4. Go to **javaApp** directory inside then Edit the file **SystemConfig.csv** to enter your **SAP Central System's** Logon connection details and remove unwanted system connection entries.

```
ubuntu@ip-172-31-69-133:~/javaApp$ cat SystemConfig.csv
SysId,SysDesc,Client,IP Address,Instance Number,Type ,Message Server,Group Server,SNC Name
EP1,EP1 System,800,108.52.246.122,02,,,,,
SR1,SR1 System,100,108.52.246.122,00,,,,,
```

5. Open Command Prompt and navigate to the 'JavaApp/AuditBOT' folder.

6.

6.1. Edit the XML file such as javaApp -> AuditBot -> **pom.xml** to update the correct Location (**Green**) of your javaApp location based on your Windows system

```
<systemPath>C:\javaApp\AuditBot\sapjco_linux\sapjco3.jar</systemPath>
```

6.2. Edit the property file such as javaApp -> AuditBot -> src -> main -> resources -> **application.properties** to update the correct Location (**Green**) of your javaApp location based on your Windows system

```
system.config.path=C:\\javaApp\\SystemConfig.csv
```

6.3. Run the command 'mvn clean install'

7. **Open notepad and paste the text below (save as SAP.BAT in javaApp folder => You may find this file in javaApp folder to use but make sure to reflect the correct Drive & folder location)**

```
set path=C:\Program Files\Java\jdk-17.0.1\bin
set classpath=C:\Program Files\Java\jdk-17.0.1\lib\tools.jar;C:\Program Files\Java\jdk-17.0.1\jre\lib\rt.jar
set SC_LIB_ROOT=E:\Auditbots\Sales\2021\OSHCO\Delivery\javaApp\AuditBot\target\AuditBot-0.0.1-SNAPSHOT.jar;E:\Auditbots\Sales\2021\OSHCO\Delivery\javaApp\AuditBot\sapjco_linux\sapjco3.jar
set SC_MQLIB=E:\Auditbots\Sales\2021\OSHCO\Delivery\javaApp\AuditBot\target\classes\com\sap\audit\bot
set classpath=%classpath%;%SC_LIB_ROOT%;%SC_MQLIB%;
pause
```

Make Sure that for the text highlighted in yellow, you have the correct path mapped based on your system/installation. The key locations used for these paths are the Location of the **Java Installation (Program Files)** and the location of the Extracted **JavaApp** folder provided by AuditBOT.

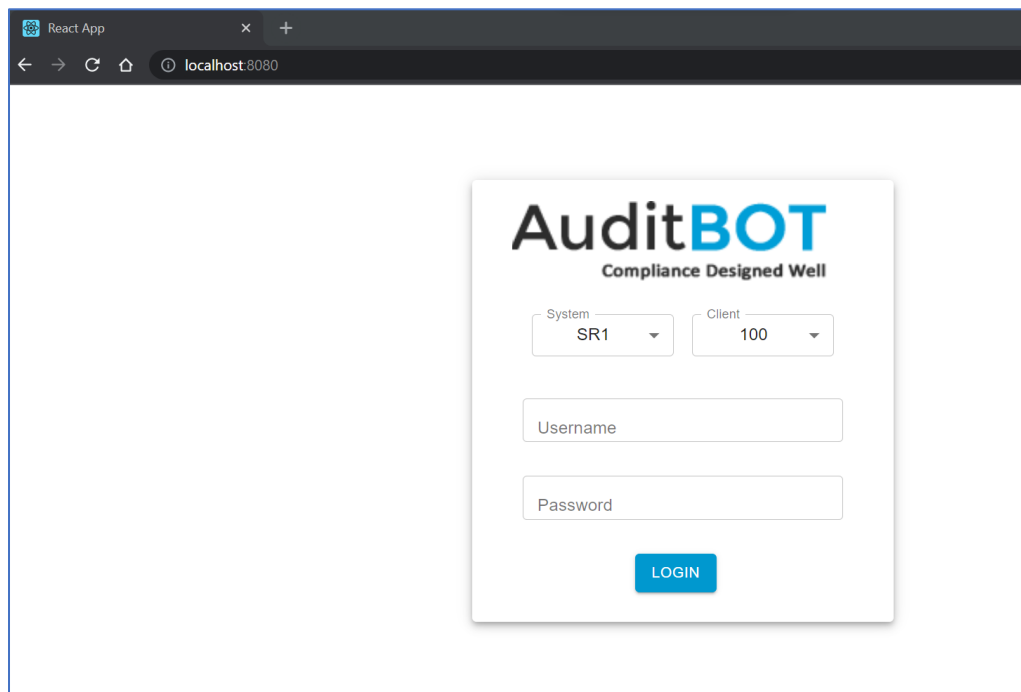

8. Open notepad and paste the text below (save as SAPSTART.BAT in javaApp folder => You may find this file in javaApp folder to use but make sure to reflect the correct folder location)

```
call sap.bat  
java com.sap.audit.bot.AuditBotApplication >> SAPLog.log &  
pause
```

9. Run the SAPSTART.BAT file as administrator.
10. Open any browser and try accessing the Java Dashboard Logon through the address below

Localhost:8080

Java Dashboard Logon Screen

The screenshot shows a web browser window with the address bar set to `localhost:8080`. The page displays the AuditBOT login interface, which includes the AuditBOT logo and tagline "Compliance Designed Well". Below the logo, there are two dropdown menus for "System" (set to "SR1") and "Client" (set to "100"). Underneath these are input fields for "Username" and "Password". At the bottom of the form is a blue "LOGIN" button.
